

Qualtrics: Creating a Survey

Center for Innovation in Teaching and Learning

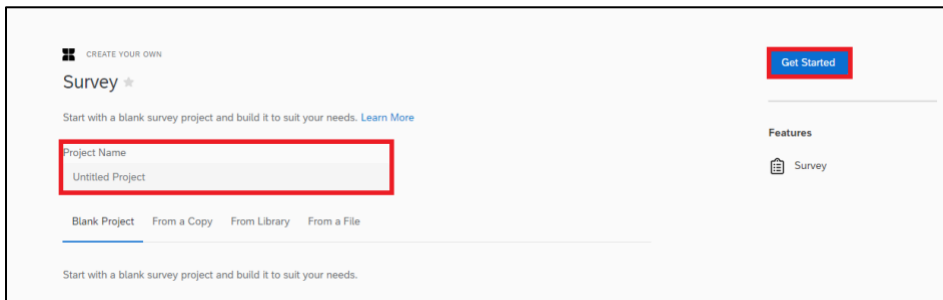

Qualtrics is a powerful and multifaceted online data collection and survey tool. It is available to all faculty and students (with faculty sponsorship).

Creating a Survey

Qualtrics allows you to create surveys with a variety of question formats and settings, including release conditions and collection responses. Follow the steps below to create a survey.

To Start a New Survey

- Select **Create New Project** on the Qualtrics home page, then select **Survey** under the **Create your own** section.
- Title your survey under **Project Name** and then select **Get Started**

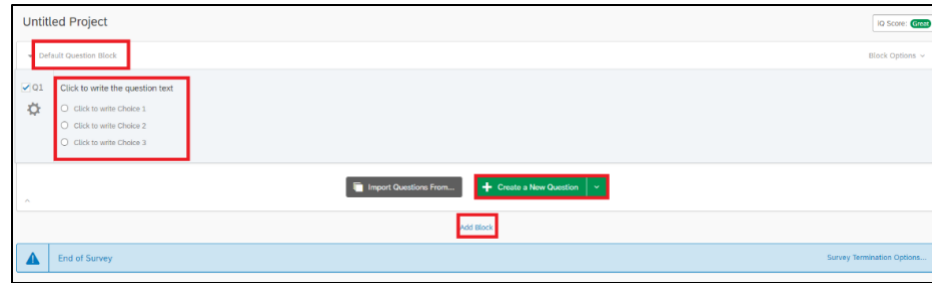

Questions and Question Blocks

Qualtrics allows you to add several different question types into your survey, as well as separating groups of questions into blocks (such as a demographics block).

To Create Questions and Blocks

- Select **Click to write the question text**
 - To create answer choices select **Click to write Choice**
 - You can add or decrease the amount of answer choices by selecting the plus or minus signs under **Choices** located in the side panel.
- To add another question, select **Create a New Question**
- To name the block, select **Default Question Block** and type in the desired name
 - To create a new question block, select **Add Block**

To Change Question Type

- Select the question and then select the **Change Question Type** drop-down menu located in the side panel

Once you have finished creating your survey you can select **Preview** in order to see what the survey will look like once published, if you are happy with the look, select **Publish**.
