Institutional Effectiveness

2021-2022

Program: Counseling and Psychology MA

College and Department: College of Education – Department of Counseling & Psychology

Contact: Stephanie Kazanas

Mission: The Department of Counseling and Psychology has the primary mission of offering strong academic programs in counseling and psychology that serve the community and public school system. The graduate program is designed to prepare people for careers in a variety of helping professions. Instruction is a major component of the academic mission of the department in the graduate programs. A committed faculty serves the programs through instruction, scholarly activity, and service aimed at providing high quality academic experiences for students. The department is strongly supportive of an environment that protects and promotes human welfare and equal opportunity. The department also serves the wider University Community, Upper Cumberland region, State, and Nation through research and public service.

Program Goals:

- PG 1: Maintain adequate faculty with appropriate expertise to deliver a quality program.
- PG 2: Maintain appropriate facilities and equipment to deliver a quality program and provide faculty with resources needed to succeed.
- PG 3: Maintain sufficient student enrollment at the graduate level to ensure the viability of the program and course offerings.

Student Learning Outcome:

SLO 1: Provide appropriate training to produce competent professionals in the concentrations we offer to meet State and national standards.

Assessment Methods:

PG 1: Maintain adequate faculty

- Faculty credentials One measure is that faculty credentials meet SACS/COC standards and standards appropriate for other accrediting agencies that evaluate our program (CAEP, CACREP).
- 2. Student Credit Hours (SCH) generated by courses.
- IDEA teaching evaluations An indirect measure of student perceptions of teaching effectiveness is the IDEA system. We would expect teaching effectiveness to meet or exceed the University and National average if we had adequate faculty with appropriate expertise delivering a quality program.
- 4. Delaware Cost Study A fourth measure of adequate faculty to maintain a quality program is based on analysis of Delaware Cost Study data involving comparisons educational

expenditures per Student Credit Hour SCH in the department to national expenditures is similar programs. The Delaware Cost Study findings also provide a way to compare the research productivity of faculty as measured by the amount of external funding generated across faculty in the department in comparison to national data for similar departments.

5. External Evaluations of Graduate Programs - Our programs are externally reviewed by CAEP and CACREP for accreditation. These external reviews examine the detailed relationship between our courses and the professional standards in the fields our curriculums are designed to prepare students to pursue.

PG 2: Maintain appropriate facilities and equipment

 Assessment of Facilities – There are a variety of means both internal and external to the department including the University evaluation of the condition of every building on campus and plans for maintenance and renovation on a regular schedule. Instructional Technology Services (ITS) sets minimum standards for computer equipment used by faculty and students at the University. Equipment that does not meet this minimum standard in the department is disconnected and replaced. The Departmental faculty are also encouraged to evaluate the facilities, available equipment, research and testing material and services, and identify needs. External program evaluations are also conducted approximately every four years.

PG 3: Maintain sufficient student enrollment

1. Number of majors

SLO 1: Produce competent professionals

- Counselor Preparation Comprehensive Examination (CPCE) Comprehensive exam by the Council for Accreditation of Counseling and other Education Professionals (CACREP) for professional counselors.
- 2. School Counseling Praxis Exam ETS test that measures candidate's knowledge and professional practice in School Counseling.
- Enrolled Graduate Student Survey The survey is administered annually to all students in the Counseling & Psychology graduate program. Questions ask students to rate Instructor Effectiveness, Relevance of Courses, Clinical Experience, and Real-World Experience.

Results:

PG 1: Maintain adequate faculty

All faculty credentials for courses taught in this discipline have met SACS/COC standards. These results suggest we are using appropriately qualified instructors in our courses. Student evaluations of teaching exceed IDEA averages across all four major outcomes each year.

Overall Outcomes	2019-2020 (UnitIDEA Averages)	2020-2021 (UnitIDEA Averages)	2021-2022 (UnitIDEA Averages)
------------------	----------------------------------	----------------------------------	-------------------------------------

Progress on Relevant Objectives	5449	56.349	54.749
Excellence of Teacher	55.350	56.350	54.750
Excellence of Course	56.351	57.351	54.751
Summary Evaluation	55.350	5750	5550

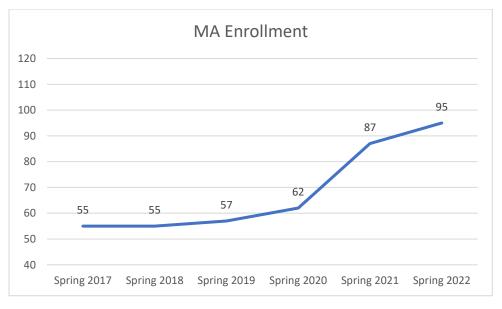

In addition, external evaluations of the graduate programs have been positive and have led to both CAEP accreditation and CACREP accreditation.

PG 2: Maintain appropriate facilities and equipment

Graduate faculty have migrated from TJ Farr to Matthews-Daniels, such that the entire Department of Counseling and Psychology can now be housed in a single building. Faculty offices are larger and all Gas have their office spaces and collaborative meeting rooms. We have painted the new faculty and GA offices and purchased new HEPA air cleaners for their offices. We are also changing air filters in our classrooms and will secure new replacement filters for the upcoming years, as well.

PG 3: Maintain sufficient student enrollment

The number of students enrolled in graduate studies in the department has been gradually increasing over the last four years, and this is largely due to our MA programs. This increase is associated with changes we made including: The implementation of a new Fast Track program for undergraduates; a new "careers in psychology" course; and strategically maximizing our enrollment across the graduate programs, all maintaining CACREP standards. Enrollment in the counseling programs has reached capacity until more licensed counseling faculty are brought onboard. This upcoming year, we anticipate hiring two new faculty members: one to support the School Counseling program (both MA and EdS students) and another to support the School Psychology program (both MA and EdS students).

SLO 1: Produce competent professionals

The graduate program continues to meet all requirements for accreditation by CAEP and CACREP.

Results from both the CPCE and PRAXIS indicate our students perform well and the average is easily within 1 SD of national means. In many cases, our students largely exceed these national averages; this was true for CPCE subscores including those covering Counseling & Helping Relationships, Group Counseling & Group Work, and Research & Program Evaluation, as well as the PRAXIS overall score.

Our annual, external advisory board also continues to be very complimentary of the program and our graduates who are in high demand across the Upper Cumberland—the region we primarily recruit from and serve.

Year	TTU	National
2016-2017	77	85.67
2017-2018	89.9	87.13

2022	5.11	5.38	5.24	5.22	4.86	4.95

Modifications for Improvement:

SLO 1 (specifically, Career Development on the CPCE): During a program evaluation, faculty noted that CACREP Standard 2.F.1.h ("Current labor market information relevant to opportunities for practice within the counseling profession") was not currently being assessed. Faculty decided to assess this standard in COUN 6300–Introduction to Counseling: Foundations, Ethics, and Legal Issues. Standard 2.F.1.h fits very well in COUN 6300 due to the pre-existing Status of Mental Health Services Paper, which has required students to investigate the variety of mental health service providers in their community. With the addition of Standard 2.F.1.h, students now explicitly address the topic of possible employment opportunities for counseling professionals in the paper. Students in COUN 6300 now receive the content of Standard 2.F.1.h through lectures and class discussions. Formative assessment of the standard occurs through the Status of Mental Health Services Paper. This standard/assessment directly taps into SLO 1, as measured by one of the CPCE subscores.
