

iLearn: Viewing Quiz Statics

Center for Innovation in Teaching and Learning

Viewing Quiz Statistics

The Statistics tool for quizzes enables faculty to view data for the entire class, individual students, and specific questions, helping to monitor student progress and track participation.

1. In your course, click **Quizzes** in the purple navigation bar.
2. The "Manage Quizzes" tab will open. Select the **Statistics** tab.
3. Select the **name** of the quiz to view its statistics.
4. There are three tabs available for viewing quiz data:
 - **User Stats:** The default view under the Statistics tab, showing quiz data by student, including grade distribution and overall grades. The class list displays the overall grade for each student, reflecting either the first or graded attempt based on quiz settings.

Last Name ▲	First Name	Overall Quiz Grade	
Student Ariana		<div><div></div></div>	84 %
Student Brandon		<div><div></div></div>	100 %
Student Carter		<div><div></div></div>	100 %

- **Question Stats:** Displays quiz data by question, including grade distribution and overall grades. A question list shows the statistics for each question, and you can preview a question by selecting its name.

Question	Average Grade	Standard Deviation	Discrimination Index	Point Biserial
Generic Questions (Questions 1 - 5)				
Random Question 1	<div><div></div></div> 60 %	n/a	n/a	n/a
Random Question 2	<div><div></div></div> 0%	n/a	n/a	n/a
Random Question 3	<div><div></div></div> 100 %	n/a	n/a	n/a
