Doctoral Students - Computer Science

City University of New York

The program prepares students for leadership positions in research and development in **computer science** and information technology industries, and for research and teaching roles in academia. Students must complete at least 60 credits, including coursework and research, with a GPA of B or better. Students must spend at least one year in full-time residence at CUNY and must complete their degree within 14 to 16 semesters, depending on their prior coursework. Leaves of absence are permitted up to four semesters, with specific application deadlines and restrictions. All students start at Level I, with progress governed by program policies. Report Summary Issue

Keywords:

computer science computational science data science artificial intelligence machine learning algorithms computational modelling natural language processing computational biology network computing See more

Amount	Deadlines	Eligibility	Submission Info
Fellowships and Financial Aid			
Every applicant to The Graduate Center's doctoral programs will automatically be considered for five-year institutional funding packages. The aid we offer - including fellowships, tuition awards, and assistantships is based on merit.			

2 Annotated keywords will help facilitate matching grants to your search semantically and contextually.

III) GRANT SUMMARIZATION

Quickly grasp the content of the call for proposal!

2

Summarization will also be available in the grant detail page, while giving the **option to switch between the original and our shortened version.**

Doctoral Students - Computer Science

This opportunity was added on October 11, 2023 and was last checked on February 06, 2024.

Overview

The CUNY Graduate Center Ph.D. Program in Computer Science prepares selected students for leadership positions in research and development careers in computer science and information technology industry, as well as for research and teaching positions in academic institutions.

Main Objectives

Master the computer science discipline in its broadest sense, obtain in-depth knowledge of specialized areas, perform independent innovative research, and prepare for careers in research, development, teaching, and industry.

Key Activities

Conducting original research in computer science, teaching at one of the CUNY colleges, completing coursework, and completing a dissertation.

Sponsors

- City University of New York (Academic)

Grant Types

1

Using AI, our system will read through the **grant description and eligibility** in details, and shorten its content into a short paragraph, saving you time and effort in the evaluation process.

grant forward

Dear ,

Thanks for using GrantForward. We are recommending you the grants we thought are relevant to your research interests. You can view all the recommended grants to you on GrantForward at [your recommendation page](#). We recommend grants based on the information on your Grant Recommendation page. You can always improve the relevancy of your recommended grants by [customizing your interest keywords](#).

1. New Recommendations
1 new grant that matches your interests was added during this period. We recommend the following grants to you:
[RFA #82: Ohio Youth-Led Collective](#)
Sponsored by [Ohio Department of Mental Health and Addiction Services](#), [State of Ohio](#). Deadline: Jul 25, 2025
The Ohio Department of [Mental Health](#) and [Addiction Services](#) seeks applications from qualified organizations to develop and sustain youth-led prevention efforts across Ohio. [Read More](#)
Keywords: [youth](#) [behavioral health](#) [youth well-being](#) [workforce development](#) [youth advocacy](#) [suicide prevention](#) [youth empowerment](#) [prevention programs](#) [community engagement](#)
[View Original Source »](#)

2. All Recommendations
In total, there are [1338 grants](#) that match your interests on GrantForward. Here are some top recommendations:
[Notice of Special Interest \(NOSI\) HEAL Initiative: Workforce Interventions to Improve \[Addiction Care\]\(#\) Quality and Patient Outcomes](#)
Sponsored by [National Institute of Mental Health](#), [National Institute on Aging](#), [5 more sponsors](#). Deadline: Sep 08, 2025
This NIH initiative aims to develop and evaluate strategies to improve recruiting, training, and retaining a [behavioral health](#) workforce that provides substance use and [mental health](#) treatment. Strategies should address barriers at individual, organizational, system, and macro levels to improve patient outcomes. [Read More](#)
Keywords: [behavioral health](#) [mental health](#) [counseling](#) [addiction medicine](#) [digital mental health](#) [mental health services](#) [social work](#) [health disparities](#) [implementation science](#) [substance use disorders](#) [education workforce development](#) ...

AI Query Assistant beta

Grant Search

Hello and welcome to GrantForward. Can you tell me about the funding opportunities you are looking for?

11:45 pm

11:47 pm

Help me find funding to support my research on air pollution as a senior researcher. Grants must be applicable from Illinois, United States, with the minimum amount of 10,000 USD

I found 93 funding opportunities for your research on air pollution as a senior researcher applicable from Illinois, United States, with a minimum amount of 10,000 USD.

11:47 pm

💡 Search Tip: You can narrow down your search by adding more specific filters such as grant status (Open, Continuous, Closed), sponsor types (Federal, Foundation, Corporate, etc.), or grant types (Research Project, Fellowship, Training, etc.). Alternatively, you can broaden your search by using high-level keywords or removing some criteria.

Would you like to narrow or broaden your search? Or do you want to apply any specific filters?

You can continue the conversation to further specify your search criteria, narrowing down or broadening your search.

IV) AI QUERY ASSISTANT

While our AI offer you support, you will still have full control over your search!

5 Once enter your query, search conditions will reflect the applications of keywords and filters our AI suggested. These keywords and filters can be further customized manually, which offers flexibility for your search.

***Note:** Your input of information **will not be exposed to a third party**, and it **will also not be used for machine learning**.

The screenshot displays the 'Grant Search' interface. On the left, a sidebar contains three buttons: 'Keyword Search', 'Recommendation', and 'AI Query Assistant ^{beta}'. An orange arrow points from the 'AI Query Assistant' button to a large white overlay window. This overlay contains two search results. The first result states: 'I found 93 funding opportunities for your research on air pollution as a senior researcher applicable from Illinois, United States, with a minimum amount of 10,000 USD.' It includes a search tip and a question: 'Would you like to narrow or broaden your search? Or do you want to apply any specific filters?'. The second result states: 'I found 24 foundation grants for your research on air pollution as a senior researcher applicable from Illinois, United States, with a minimum amount of 10,000 USD.' It also includes a search tip and the same question. Below the overlay, the 'Query Summary' section shows filters: 'Has keywords: "air pollution" OR "air quality" OR pollution OR "air ... X', 'Amount is more than 10,000 USD, including unspecified grants X', 'Of sponsor types: Foundation X', 'With applicant locations: United States/Illinois, including unspecifi... X', and 'With applicant types: Individual Applicant, Investigator, Senior, i... X'. At the bottom left, there are filter categories: 'Sponsors', 'Sponsor's Country', and 'Categories', each with a dropdown arrow. A 'Go to' button with a filter selection dropdown is also present.

V) SMARTER RECOMMENDATIONS

Better matching opportunities, customized and delivered to you!

1 Manually fill in your keywords of interests, or an automatically keyword list from your researcher profiles.

2 By combining AI powered tools and our keyword glossary, our recommendation system now delivers to you much better matching grants than before.

Grant Recommendation

Recommendation is a powerful feature on GrantForward that allows you to find opportunities that match your research / study interests. You can also choose to receive periodic updates about new matching opportunities via emails.

You can set up your recommendation using the following option(s):

Customize Your Interest Keywords

GrantForward will use these interest keywords to match opportunities for you.

Customize Keyword

Use Keywords from Your Researcher Profile

Alternatively, GrantForward can import the keywords from your Researcher Profile directly and use them to recommend opportunities for you.

Update Keywords from Your Researcher Profile

Interest Keywords

You can add, remove, or adjust the significance of each keyword. The recommendation results will be tuned accordingly.
