	Synopsis	AFE offers two merit-based scholarships to assist in funding the education of full-time graduate students (MS or Ph.D.) who will become leading floricultural scientists and educators.		
	Applicant Types			

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

Objectives	The primary objective of these scholarships is to assist in funding the education of full-time graduate students (MS or Ph.D.) who will become leading floricultural scientists and educators.			
Eligibility	All U.S. citizens, permanent residents and qualified international students are eligible to apply. The applicant must be in the process of successfully completing either a bachelor's or master's degree in horticulture or a related field, e.g., agricultural engineering, entomology, agricultural marketing and economics, plant pathology, etc. Applicants must have the intention of pursuing a MS or Ph.D. degree on a full-time basis in a selected floricultural area and under the direction of a world-renowned floriculture scientist. The Ecke scholarship is only for students attending a U.S. land-grant university, e.g., Cornell, Michigan State University, NC State University, The Ohio State University, Texas A&M University, UC Davis, University of Florida, etc. Only one application is needed for the Altman and Ecke scholarships. Those attending land-grant universities will automatically be considered for the Paul Ecke, Jr. Scholarship. All others will only be considered for the Altman Family Scholarship.			
Funding	The Altman Family Scholarship is a one-year scholarship for \$5,000. The Paul Ecke, Jr. Scholarship is a two-year scholarship for \$10,000 (\$5,000 per year). (rjh)

Deadline Dates (ALL)	22-Feb-2019			
Synopsis	This scholarship is for pharmacy students currently enrolled in an ACPE accredited School of Pharmacy.			
Applicant Types				
Objectives	The primary goal of the Gateway to Research Scholarship program is to help students gain an understanding of the importance of research by enabling them to apply that knowledge to improve their clinical skills. This scholarship provides a unique opportunity for talented Pharm.D. and baccalaureate degree students to participate in a faculty-mentored research project. The Gateway to Research Scholarship also encourages students who have the aptitude and desire to pursue a career in research to continue their education in a Ph.D. program. This award helps students to learn to identify relevant research problems, generate a research hypothesis, analyze data, learn how to interpret and use research results in practice, learn to effectively communicate research and clinical data to a broad audience, develop problem solving skills, and sharpen critical thinking skills. Overall			

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

Eligibility	<p>the exposure to and understanding of research enables them to improve their clinical skills to facilitate better communication with patients and medical team members, thus equipping them for the changing healthcare workforce.</p> <p>Eligible applicants must meet the following criteria: U.S. citizen or a permanent resident Full-time student enrolled in a: Pharm.D. program, have completed at least two years of college, and be enrolled in at least the first year of the professional pharmacy curriculum at an ACPE accredited School of Pharmacy, or, Baccalaureate degree program and have completed at least one year of the degree program in an ACPE accredited School of Pharmacy. Students enrolled in joint Pharm.D./Ph.D. programs may not apply. Student must be enrolled for at least one full academic year after initiation of the award. Must be nominated and mentored by a faculty member in a: School of pharmacy accredited by the Accreditation Council for Pharmacy Education, or, any college awarding baccalaureate degrees, provided the faculty member is actively undertaking research in the pharmaceutical sciences Nominating faculty member must agree to mentor the student in the proposed research during the entire one-year award period, as required. No more than two applications per school, therefore school faculty and administrators must coordinate which two applications to put forward.</p>					
Funding	<p>This research scholarship is accompanied by a \$5,000 stipend which may be used for research related expenses in support of the research plan outlined in their application. Funds should not be used for indirect costs by the institution. (tld)</p>

Deadline Dates (ALL)	01-Feb-2019			
Synopsis	The American Academy of Optometry Foundation offers Ezell Fellowships to encourage talented persons to pursue full-time careers in optometric research and education in a school or college of optometry. These one-year fellowships provide support to graduate students enrolled in a full-time program of study and training in vision-related research that leads to a Master's or PhD degree.			
Applicant Types				
Objectives	The American Academy of Optometry Foundation has offered Ezell Fellowships to encourage talented persons to pursue full-time careers in optometric research and education in a school or college of optometry. The Ezell Fellowship program is extremely competitive. There are approximately 40 applicants for an estimated nine to eleven fellowships given each year. Fellowships focus on specialized areas of research, such as glaucoma, cornea and contact lenses, and binocular vision and pediatrics. Preference will be given to first time awardees.			
Eligibility	Applicants must be a graduate student enrolled in a full-time program of study and training in vision-related research that leads to a Master's or PhD degree. Completion of the degree program cannot be within the calendar year of the award/competition. Applicants must be a member of the American Academy of Optometry (AAO); whether as a student, candidate, or Fellow at the time of acceptance of any award. Previous Ezell Fellows are eligible to apply. The maximum number of years an individual can be awarded an Ezell Fellowship is two years.			
Funding	Fellowships are for one year and the current amount of the award is \$8,000. Each student also receives travel grants to the annual meetings of the American Academy of Optometry and the

	Deadline Dates (ALL)	01-Mar-2019		
	Synopsis	This program is intended to identify racial/ethnic minority medical students who have an interest in psychiatry. Selected medical students are matched with a mentor based on interest of the medical student and the specialty mentor, practice setting (i.e. research or clinical), geographic proximity of the mentor and mentee. Applicants are encouraged to approach possible mentors, particularly those with compatible interests of work.		
	Applicant Types			
	Objectives	The goal of the mentorship program is to expose awardees to a setting where they can work closely with a psychiatrist mentor. The emphasis is working with underserved minority populations and mental health care disparities. Most work settings will be inner-city or rural. In the past, awardees have been exposed to psychiatric subspecialties, particularly substance use disorders, geriatrics and child and adolescent psychiatry.		
	Eligibility	Eligibility criteria are as follows: -APA Student Member at the time of application; -US Citizen or permanent resident; -currently enrolled in an accredited U.S. medical school; and -ability to commit to the duration of the program.		
	Funding	The sponsor anticipates making eight awards. This fellowship provides \$1,500 for living expenses and funding to and from mentoring site location (if out of state). (cmb)

Synopsis	The ASID National Student Portfolio Competition generates the best collection of design projects from interior design students across the nation. Top student portfolios are invited to attend an exclusive student portfolio track at SCALE: The ASID National Student Summit for a chance at an internship with a top firm.			
Applicant Types				
Objectives	Submissions are evaluated on conceptual thought, content of work submitted, and the student's record of achievement.			
Eligibility	Entrants must be enrolled as a student in the U.S. or Canada as of September 1, 2018. The cost to enter is: \$0 for ASID and IDC student members. One submission per student. \$85 per non-member submission (includes an ASID student membership valid until you graduate).			
Funding	All entrants to the ASID Student Portfolio Competition will receive 30% off SCALE general price registration (a savings of \$90). Semi-finalists will receive 40% off SCALE general price registration (a savings of \$120) as well as exposure to firm leaders who will review their portfolio. Judging includes two rounds of online reviews, and one round of finalist interviews to take place the day before SCALE: The ASID National Student Summit on February 28, 2019 in New York. The 2019 experience will culminate at SCALE where finalists will present their portfolios to a panel of judges in the hope of securing a 2019 scholarship and broad national exposure. The winners will be recognized at SCALE on March 1, 2019. Each SPC winner will receive a scholarship from the Benjamin Moore & Co. Foundation. (des)

Synopsis	The Oak Ridge Institute for Science and Education (ORISE) Research Participation Programs at the Centers for Disease Control and Prevention (CDC) are educational and training programs designed to provide students and recent graduates opportunities to participate in project-specific CDC research and developmental activities at CDC facilities that are related to CDC's mission.			
Applicant Types				
Objectives	Opportunities include full-time, part-time, and summer appointments. Limited opportunities may be available for full-time faculty who are currently employed at U.S. accredited colleges and universities.			
Eligibility	Eligible applicants are currently pursuing an Associate's degree , Bachelor's degree , Master's degree , or Doctoral degree or have received one of these degrees within 60 months at an accredited U.S. college or university pursuing a degree in a STEM discipline. New participants who have a bachelor's degree at the start of the appointment will be limited to a total of five years of participation calculated from the original appointment start date. Undergraduate students may be in the program for a total of four years while obtaining a bachelor's degree. The four-year maximum will be calculated from the original undergraduate appointment start date, inclusive of breaks in service. Once the bachelor's degree is conferred, the individual is eligible for up to five additional years calculated from the new post-bachelor's appointment start date, inclusive of breaks in service.			
Funding	Appointments can vary from three months to one year and be renewed upon recommendation of CDC, contingent on the availability of funds. The participant will receive a monthly stipend commensurate with educational level and experience. Proof of health insurance is required for participation in this program. The appointments are at CDC in Atlanta, Georgia, as well as other CDC locations. Participants do not become employees of CDC, DOE or the program administrator, and there are no employment-related benefits. (tld)

Deadline Dates (ALL)	14-Jan-2019
Synopsis	<p>The Bill Emerson National Hunger Fellowship, a project of the Congressional Hunger Center, is a unique leadership development opportunity that trains, inspires, and sustains a network of leaders committed to social justice. The Emerson program bridges community-based efforts with national public policy to develop Hunger Fellows as effective leaders in the movement to end hunger and poverty. The Congressional Hunger Center establishes Fellow financial packages based on location, taking into consideration the field and policy site location cost of living. Emerson Fellows also gain: Membership in a dynamic learning community of Fellows Connection to an extensive network of alumni, partners, and experts Experience working with community and policy leaders Training / mentoring / leadership development Project management experience</p>
Applicant Types	<p>Each year, 16-20 participants are selected from around the country for this year long program. They gather in Washington, D.C. in August for a comprehensive orientation and field training, where they learn about hunger, poverty and social inequality in the United States, the local and national programs designed to address the issues, and the various approaches to social change. Emerson Fellows are placed for the first five months with community-based organizations all over the country. Each host organization identifies specific goals and outcomes for the Fellows and provides the supervision and resources necessary to accomplish them. In mid-February, the Fellows regroup in Washington, D.C. to debrief and share their field experiences and participate in an extensive policy training to learn about national anti-hunger and anti-poverty policy work. Fellows then work at national policy organizations (advocacy groups, think tanks, and government agencies) working on hunger and poverty policies at the national level. During their time in D.C., Fellows complete research, outreach, advocacy, and public education projects that support national policy initiatives. They also meet regularly for professional development trainings. Selection criteria include: commitment to racial equity and social justice; demonstrated leadership qualities and skills; bachelor's degree or equivalent experience; flexibility and ability to adjust to new situations; creativity and initiative in problem solving; enthusiasm for learning from experts in the field, and searching for new models in anti-hunger and anti-poverty work; experience working in low-income communities; excitement about peer learning in a tight-knit community of Fellows.</p>
Objectives	<p>The program is only open to U.S. citizens and permanent legal residents. Applicants who have received Deferred Action for Childhood Arrivals (DACA) through the U.S. Department of Homeland Security are not eligible to serve as Hunger Fellows at this time.</p>
Eligibility	
Funding	Typically, Fellows receive financial packages in the range of 38,000 to 43,000 over the duration of the

Deadline Dates (ALL)	14-Jan-2019			
Synopsis	The Congressional Hunger Center (CHC) seeks talented applicants from every sector and background who are dedicated to fighting hunger and poverty on a global scale for their Mickey Leland International Hunger Fellows Program. This is a unique two-year program that combines field and policy work. Leland Fellows develop new skills while actively working to alleviate hunger and poverty in Asia, Africa, and Latin America.			
Applicant Types	Leland Fellows are chosen through a highly competitive application process. Fellowship candidates apply to the Leland Program itself rather than to a specific placement. Candidates are first assessed on their fit for the fellowship. If successful, they are matched to potential placements for another round of assessment. The Leland Fellowship consists of a field placement and a policy placement. During the field year, fellows work to at a programmatic level to support food and nutrition security interventions. During the policy year, fellows apply their knowledge and experience to the design of sound development policy at the organizational, national, and/or international level. The fellowship years can be in either order. During their service, CHC provides Leland Fellows: Financial support: Each fellow receives a financial package designed to support living expenses (placement location specific), and help offset the costs of housing, relocation, and acquisition of public market health insurance. Leadership development training: Leland Fellows complete a leadership development curriculum during their two years in the fellowship. This curriculum is based in CHC's Leadership Capabilities Model, content knowledge and cohort support and learning. It is delivered via a mix of platforms including in-person training weeks and virtual discussion fora. Advising: Each Leland Fellow receives advising and professional development support from CHC staff in formal and informal ways. Professional Development Funds: Leland Fellows are given access to funds that can be used for specific professional development activities identified by the fellow. PDF is especially useful in allowing each fellow to gain skills and experience different from and additional to the on-the-job learning they do at their placements. Membership in a dynamic learning cohort of fellows: Each

057137	<a href="#">Pathfinder Graduate Student Fellowships</a>	Consortium of Universities for the Advancement of Hydrologic Science, Inc.	31-Oct-2019	5,000 USD
--------	---	--	-------------	-----------

---

**Sponsor Website** <https://www.cuahsi.org>

**Program URL** <https://www.cuahsi.org/education/pathfinder-fellowships/>

**Deadline Dates (ALL)** 31-Oct-2019

**Synopsis** The CUAHSI Pathfinder Fellowship program provides travel funds to graduate students in hydrology and related sciences to make an extended trip to enhance their research by adding a field site to conduct comparative research, collaborating with a research group, or working with researchers on adding an interdisciplinary dimension to a project. Fellowships are awarded to cover travel costs up to a maximum of \$5000.

**Applicant Types**

**Objectives** Specific outcomes of the Pathfinder Award are as follows: Final Report: Recipients will be required to submit a final report documenting effort and significant outcomes of the sponsored activities to

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

		<p>receive full reimbursement. Dissemination: Recipients are expected to develop and execute a plan for disseminating their research results, including the archiving and publication of any data collected. CUAHSI Biennial Attendance: Recipients are invited (and encouraged) to attend CUAHSI's Biennial Colloquium on Water Science and Engineering to present research results enabled by the Pathfinder Fellowship. A new requirement in 2018 is a brief data management plan, which describes how the applicant plans to obtain, store, and disseminate data products resulting from the Pathfinder Fellowship. While all graduate students in the U.S. are eligible, to date all recipients have been at the PhD-student level. Past selection committees have felt that the level and amount of research required for a successful application is generally PhD level research. Masters students are encouraged to contact CUAHSI program staff to discuss their proposed project before submitting an application.</p>		
	Eligibility	Graduate students enrolled in either Masters or PhD programs are eligible to apply. Recipients must be enrolled in a graduate program at a U.S. University.		
	Funding	Fellowships are awarded to cover travel costs up to a maximum of \$5000. Funds are available for travel reimbursement for the Awardee only and will be provided in accordance with the CUAHSI Travel Policy. (sch)		
094903	<a href="#">Postdoctoral Fellowship in Academic Libraries</a>	Council on Library and Information Resources	None Posted	Not Specified
	Sponsor Website	<a href="http://www.clir.org/fellowships/postdoc">http://www.clir.org/fellowships/postdoc</a>		
	Program URL	<a href="https://www.clir.org/fellowships/postdoc/info/academic-libraries/">https://www.clir.org/fellowships/postdoc/info/academic-libraries/</a>		
	Deadline Dates (ALL)			
	Synopsis	This fellowship provides recent Ph.D. recipients a unique opportunity to develop expertise in the new forms of scholarly research and the information resources that support them, both traditional and digital, that are challenging research institutions. Fellowships are open to any specialty or domain in which the Ph.D. is the terminal degree.		
	Applicant Types			
	Objectives	The program offers fellowships to individuals who believe that there are opportunities to develop meaningful linkages among disciplinary scholarship, libraries, archives, and evolving digital tools. Former fellows have high placement rates as researchers and professionals in academic libraries and as members of teaching faculties. CLIR Postdoctoral Library Fellows work on projects that forge, renovate, and strengthen connections between academic library collections and their users. The		

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

program offers scholars the chance to develop new research models, collaborate with information specialists, and explore new career opportunities. Participating libraries benefit from the expertise of accomplished scholars who can invigorate approaches to collection use and teaching, contribute field-specific knowledge, and provide insight into the future of scholarship. Fellows are placed at diverse institutions from large research universities to small liberal arts colleges across the United States and Canada. All interested candidates are encouraged to apply regardless of subject expertise or geographic preference. New fellowships are added throughout the year.

Recent PhD's from any discipline in the humanities, sciences, and social sciences are invited to apply. To be considered for 2019 Postdoctoral Fellowships, applicants must: have received a Ph.D. after January 1, 2014, but before beginning the fellowship; be legally permitted to work in the United States or Canada between 2019 and 2021 during the fellowship; submit a complete application package, including all supporting documentation, and attend the program's mandatory seminar to be held in late July – early August, 2019 at Bryn Mawr College in Bryn Mawr, PA.

Remuneration varies by sponsoring institution and by type of fellowship; benefits and some travel expenses are routinely provided. Fellowships may be one, two, or three years. All fellows must attend an intensive summer seminar before beginning their fellowship. The next seminar will take place in late July – early August, 2019 at Bryn Mawr College. (tld)

Deadline Dates (ALL)	15-Jan-2019			
Synopsis	The sponsor offers three Dissertation Fellowships each year to support scholarly research and writing among qualified civilian graduate students preparing dissertations in the history of warfare. One Fellowship is designed to support dissertations that explore the material culture of the Army; the two others support research in the more general areas of military history in all its many aspects. Applicants should specify if they wish to compete for the two general fellowships or for the Museums fellowship.			
Applicant Types				
Objectives	For purposes of this program, the history of war on land is broadly defined, including such areas as biography, military campaigns, military organization and administration, policy, strategy, tactics, weaponry, technology, training, logistics, and the evolution of civil-military relations. In the selection of proposals for funding, preference is given to topics on the history of the U.S. Army. Topics submitted should complement rather than duplicate the Center's existing projects.			
Eligibility	Applicants who wish to become Fellows must be civilian citizens of the United States unaffiliated with			

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

	Funding	<p>the U.S. government; that is, they must not be military personnel, not in federal service as civilian employees, and not under contract to the U.S. government. They must demonstrate their professional potential by submitting the following: (1) official transcripts from all undergraduate and graduate schools attended; (2) a proposed plan of research; (3) a letter of recommendation from their academic director that includes a statement approving the dissertation topic; (4) two other letters of recommendation from individuals who can attest to their qualifications for the fellowship; and (5) a writing sample of approximately 25 pages. (Please submit an entire piece rather than a fragment.) Applicants must have completed by September all requirements for the Ph.D. degree, except for the dissertation . Any student who has held or accepted an equivalent fellowship from any other Department of Defense agency is not eligible for these awards. Individuals who accept a Center of Military History fellowship may not accept a fellowship from any other institution for a period concurrent with the Center's fellowship.</p> <p>The stipend of \$10,000 for the fellowship is provided in one payment at the start of the academic year. From this sum, the recipient must meet travel, typing, and all other expenses in connection with the fellowship. The payment of the stipend is made directly to the Fellow upon receipt of certification from the parent academic institution that he or she is a candidate for the Ph.D. degree and is authorized to become a Visiting Research Fellow. Fellows also have access to the Center's facilities and technical expertise. (cmb)</p>

	Deadline Dates (ALL)	21-Oct-2019 , 22-Oct-2019 , 24-Oct-2019 , 25-Oct-2019 , 19-Oct-2020 , 20-Oct-2020 , 22-Oct-2020 , 23-Oct-2020
	Synopsis	<p>The purpose of the NSF Graduate Research Fellowship Program (GRFP) is to help ensure the vitality and diversity of the scientific and engineering workforce of the United States. The program recognizes and supports outstanding graduate students who are pursuing full-time research-based master's and doctoral degrees in science, technology, engineering, and mathematics (STEM) or in STEM education. The GRFP provides three years of support for the graduate education of individuals who have demonstrated their potential for significant research achievements in STEM or STEM education. NSF especially encourages women, members of underrepresented minority groups, persons with disabilities, veterans, and undergraduate seniors to apply.</p>

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

Applicant Types

The Graduate Research Fellowship Program (GRFP) awards Fellowships for graduate study leading to research-based master's and doctoral degrees in STEM or in STEM education. GRFP supports individuals proposing a comprehensive plan for graduate education that takes individual interests and competencies into consideration. The plan describes the academic achievements, attributes, and experiences that illustrate the applicant's demonstrated potential for significant research achievements. Thus, an applicant must provide a detailed profile of their relevant education, research experience, and plans for graduate education that demonstrates this potential. Prospective applicants are advised that submission of an application implies their intent to pursue graduate study in a research-based program in STEM or STEM education at an institution of higher education (IHE) or at a non-profit, non-academic organization accredited in, and having a campus located in, the United States, its territories, or possessions, or the Commonwealth of Puerto Rico. All applicants are expected to either be enrolled in a research based master's or doctoral program, or have adequate preparation to enroll in a degree-granting graduate program by summer or fall of the year the award is accepted. From the date of Acceptance through Completion or Termination of the Fellowship, applicants accepting the award (Fellows) must be affiliated with a graduate degree-granting institution/organization accredited in, and having a campus located in, the United States, its

Objectives

territories, or possessions, or the Commonwealth of Puerto Rico. Fields of study are as follows:  
**CHEMISTRY** Chemical Catalysis; Chemical Measurement and Imaging; Chemical Structure, Dynamics, and Mechanism; Chemical Synthesis; Chemical Theory, Models and Computational Methods; Chemistry of Life Processes; Environmental Chemical Systems; Macromolecular, Supramolecular, and Nanochemistry; Sustainable Chemistry; Chemistry, other (specify).  
**COMPUTER AND INFORMATION SCIENCES & ENGINEERING** Algorithms and Theoretical Foundations; Bioinformatics and other Informatics; Communication and Information Theory; Computational Science and Engineering; Computer Architecture; Computer Networks; Computer Security and Privacy; Computer Systems and Embedded Systems; Data Mining and Information Retrieval; Databases; Formal Methods, Verification, and Programming Languages; Graphics and Visualization; Human Computer Interaction; Machine Learning; Natural Language Processing; Robotics and Computer Vision; Software Engineering; CISE, other (specify).  
**ENGINEERING** Aeronautical and Aerospace Engineering; Bioengineering; Biomedical Engineering; Chemical Engineering; Civil Engineering; Computer Engineering; Electrical and Electronic Engineering; Energy Engineering; Environmental Engineering; Industrial Engineering & Operations Research; Materials Engineering; Mechanical Engineering; Nuclear Engineering; Ocean Engineering; Optical Engineering; Polymer Engineering; Systems Engineering; Engineering, other (specify).  
**GEOSCIENCES** Aeronomy; Atmospheric Chemistry;

STEM EDUCATION AND LEARNING RESEARCH Engineering Education; Science Education; Mathematics Education; Technology Education; STEM Education and Learning Research, other (specify).

Eligibility Applicants must self-certify that they are eligible to receive the Fellowship. To be eligible, an applicant must meet all of the following eligibility criteria by the application deadline: -be a U.S. citizen, national, or permanent resident; -intend to enroll or be enrolled full-time in a research-based graduate degree program in an eligible Field of Study in STEM or STEM education; -have never previously accepted a GRFP award; -if previously offered a GRFP award, have declined by the

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

deadline; -have never previously applied to GRFP while enrolled in a graduate degree program; -have never earned a doctoral degree; -have never earned a master's, professional, or bachelor's-master's degree in any field, unless returning to graduate study after an interruption of at least two years; -not be a current NSF employee. Undergraduate seniors and bachelor's degree holders may apply before enrolling in a degree-granting graduate program. Graduate students enrolled in a degree-granting graduate program are limited to only one application to the GRFP, submitted in the first year or at the beginning of the second year of their degree program. Effective with the 2020 competition (Fall 2019 deadline), individuals pursuing a master's degree simultaneously with the bachelor's degree (joint bachelor's-master's degree) will be limited to one application to GRFP; they will not be eligible to apply again as a doctoral degree student. Individuals in this category applying in the 2019 competition (Fall 2018 deadline) will have one more opportunity to apply as first-year doctoral students in the 2020 competition (Fall 2019 deadline). Individuals holding joint bachelor's-master's degrees who have not previously applied as graduate students may apply as first-year doctoral students in the 2019 competition. Applications withdrawn by November 15 of the application year do not count toward the one-time graduate application limit. Applications withdrawn after November 15 count toward this one-time limit. An eligible applicant may submit only one application per annual competition.

Funding Each Fellowship consists of three years of support during a five-year fellowship period. Currently, NSF provides a stipend of \$34,000 to the Fellow and a cost-of-education allowance of \$12,000 to the graduate degree-granting institution for each Fellow who uses the fellowship support in a fellowship year. No indirect costs are allowed. CFDA #'s: 47.041; 47.049; 47.050; 47.070; 47.074; 47.075; 47.076; 47.079; 47.083. (cas)

076520	<a href="#">NSF Astronomy and Astrophysics Postdoctoral Fellowships (AAPF)</a>	Directorate for Mathematics and Physical Sciences/NSF	18-574	15-Oct-2019	300,000 USD

Sponsor Website	<a href="https://www.grants.gov/web/grants/view-opportunity.html?oppld=307618">https://www.grants.gov/web/grants/view-opportunity.html?oppld=307618</a>
Program URL	<a href="https://www.nsf.gov/pubs/2018/nsf18574/nsf18574.htm">https://www.nsf.gov/pubs/2018/nsf18574/nsf18574.htm</a>
Deadline Dates (ALL)	15-Oct-2019
Synopsis	NSF Astronomy and Astrophysics Postdoctoral Fellowships provide an opportunity for highly qualified, recent doctoral scientists to carry out an integrated program of independent research and education. Fellows may engage in observational, instrumental, theoretical, laboratory or archival data research in any area of astronomy or astrophysics, in combination with a coherent educational plan for the duration of the fellowship. The program supports researchers for a period of up to three

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

Applicant Types	<p>years with fellowships that may be taken to eligible host institutions of their choice. The program is intended to recognize early-career investigators of significant potential and to provide them with experience in research and education that will establish them in positions of distinction and leadership in the scientific community.</p>
Objectives	<p>Applicants are encouraged to approach the fellowships as opportunities to broaden their experience with research that moves beyond their previous research focus and that takes a broad view of integrating disciplines, extending technical approaches to problems, or expanding collaborations. Research that highlights the creative use of or is clearly related to NSF-funded facilities, institutes, or projects is particularly encouraged but not required. We encourage applicants to consider programs that focus on areas of research that are particularly facilitated or enabled by new ground-based capabilities in radio, optical/infrared, or solar astrophysics, including the development of theory that guides their use or the interpretation of resulting data. In all cases, proposals must demonstrate the astronomical context of the work. Proposals that do not adequately demonstrate the astronomical context may be returned without review. Proposals that are solely or predominantly for the acquisition, analysis, or interpretation of data from NASA-supported missions will be returned without review. Please contact the cognizant NSF program officer if you have any questions about the suitability of your proposal for the AAPF Program. Applicants are expected to include educational activities in their fellowship plans, and they must present a substantive, coherent program of educational activities as part of the proposal. Examples of such activities include teaching or co-teaching one course each year at the host institution or an academic institution with ties to their host institution, developing educational materials, or engaging in a significant program of outreach or public education. As a rough guideline, Fellows should plan to dedicate no less than 10% and no more than 25% of their time towards their educational activities; applicants should identify the anticipated time commitment for their proposed activities. Applicants are encouraged to discuss the proposed educational activities with their prospective host institution prior to proposal submission to ensure that their educational plan is consistent with opportunities and plans at the institution. Applicants may propose to hold the fellowship at U.S. institutions of higher education, NSF-funded centers, facilities, institutes, or U.S. non-profit organizations with research and educational missions. Fellowship tenure is also allowed at international sites that are operated by U.S. organizations eligible for NSF funding, such as the Atacama Large Millimeter/submillimeter Array, Cerro Tololo InterAmerican Observatory, or Gemini South. Fellows are expected to be fully integrated into the research and educational activities of their host institution.</p>

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

Eligibility	<p>Fellowships are awarded to individuals. The fellowship applicant submits his or her proposal directly to NSF. An individual is eligible to submit a proposal to the NSF AAPF Program if all of the following criteria are met: -the applicant is a citizen, national, or lawful permanent resident (Green Card Holder) of the United States; and -the applicant has earned the doctoral degree in an appropriate scientific field within five years prior to the proposal submission deadline or will complete the doctoral degree by 1 October following the proposal deadline. Each applicant may submit only one AAPF proposal per annual competition.</p>				
Funding	<p>Support may be requested for up to 36 months at a level of \$100,000 per year. The annual fellowship amount consists of two types of payments: -an annual stipend of \$69,000, paid directly to the Fellow on a monthly schedule; -an annual fellowship allowance of \$31,000, paid directly to the Fellow and intended to cover costs of the fellowship, including: expenses directly related to the conduct of the proposed research and education activities, including but not limited to materials and supplies, equipment, computing resources, access to databases, travel, publication charges, and subscription fees; expenses in support of the Fellow, such as office space, general purpose supplies and use of equipment, facilities and other institutional resources; and expenses in support of fringe benefits, including but not limited to individual or family health insurance provided through a group or individual plan, dental and/or vision insurance, disability insurance, retirement savings, dependent care, and moving expenses. Source: Grants.gov (07/27/18). (cas)</p>

Deadline Dates (ALL)	04-Feb-2019 , 05-Aug-2019				
Synopsis	<p>The Science, Technology, and Society (STS) program supports research that uses historical, philosophical, and social scientific methods to investigate the intellectual, material, and social facets of the scientific, technological, engineering and mathematical (STEM) disciplines. It encompasses a broad spectrum of STS topics including interdisciplinary studies of ethics, equity, governance, and policy issues that are closely related to STEM disciplines, including medical science. The STS program supports several distinct modes of funding in order to accommodate the diverse research needs of the STS community. Modes of support include Standard Research Grants and Grants for Collaborative Research, Scholars Awards, Postdoctoral Fellowships, Conference and Workshop Support, and Doctoral Dissertation Research Improvement Grants.</p>				

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

Applicant Types

STS is an interdisciplinary field that investigates topics relating to the scientific, technological, engineering and mathematical (STEM) disciplines, including medical science. STS research uses historical, philosophical, and social scientific methods to investigate STEM theory and practice with regards to history and socio-cultural formation, philosophical underpinnings, and impacts of science and technology on quality of life, culture, and society. STS researchers strive to understand how STEM fields contribute to the development and use of systems of knowledge, the production and use of materials and devices, the co-evolution of socio-technical systems and their governance, and the place of science and technology in the modern world. STS research focuses on the intellectual, material, and social facets of STEM. Such research endeavors to understand how scientific knowledge is produced and sanctioned, and how it is challenged and changes. It explores broader societal ramifications and underlying presuppositions. STS research studies how materials, devices, and techniques are designed and developed; how and by whom they are diffused, used, adapted, and rejected; how they are affected by social and cultural environments; and how they influence quality of life, culture, and society. STS research explores how socio-cultural values are embedded in science and technology, and how issues of governance and equity co-evolve with the development and use of scientific knowledge and technological artifacts. STS researchers make use of methods from a

Objectives

variety of disciplines, including anthropology, communication studies, history, philosophy, political science, and sociology. STS research includes interdisciplinary studies of ethics, equity, governance, and policy issues. STS studies may be empirical or conceptual. Effective STS proposals will clearly present the research questions, describe and explain the suitability of the methods to be used to address those questions, and provide a detailed work plan with a timeline that demonstrates adequate resources and access to any required data. If the plan involves research at archives, working in specific labs, or engaging with pertinent community groups, it is important to provide evidence of access and to indicate the specific questions to be asked or addressed. If the plan involves surveys, the proposal should discuss sample selection and survey design and content. Similar advice pertains for other modes of STS research involving focus groups, ethnographies, modeling, conceptual analysis, and so forth. Effective proposals suitably situate the proposed project in pertinent STS literatures, issues, and conceptual or theoretical frameworks, and articulate how the results of the proposed project would serve to advance STS, or subfields thereof. Standard Grants and Collaborative Research Grants support proposals for basic STS research. They also support proposals for infrastructure development that serves to enhance STS research; program support of infrastructure projects is directed towards scholarly research and data production, rather than administrative or logistical activities. Scholars Awards provide up to full-time release for an academic

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

year and a summer to conduct research. This time can be distributed over two or more years. In exceptional circumstances, longer releases can be requested. Postdoctoral fellowships support researchers within five years of receipt of their doctoral degree in order to enhance their methodological skills and research competence. Proposals for postdoctoral fellowships must include a mentoring plan, consistent with the PAPPG and which includes mentoring in the ethical conduct of research. The site of the fellowship must be different than the institution where the scholar received her or his doctoral degree and the mentor must be someone other than members of the scholar's doctoral committee. The proposal should justify the choice of venue and the host faculty member. Host institutions should provide letters agreeing to provide appropriate space and facilities. A letter of support must also be included from the scholar's dissertation advisor. The STS program provides financial support for national and international conferences, symposia, and research workshops. The program is particularly interested in proposals that promote new research networks between researchers in STS and scientists and engineers, or between STS scholars and members of scholarly communities not normally in contact with each other. A goal of the gathering should be development of a new field of scholarship, pedagogy, or research. DDRIGs provide funds for dissertation research expenses not normally available through the student's university. The dissertation director is the Principal Investigator on these proposals; the doctoral student should be listed as Co-Principal Investigator.

Eligibility Organization limit varies by the mode of support: Standard Research Grants and Grants for Collaborative Research -- US academic institutions and non-profit research organizations; Scholars Awards and Postdoctoral Fellowships -- US academic institutions and independent scholars; Doctoral Dissertation Research Improvement Grants: US academic institutions; and Conference and Workshop Support: No limitations. Scholars Awards are normally made to U.S. academic institutions, although an individual who is not affiliated with an appropriate U.S. academic institution may submit a proposal as an independent scholar, in which case the scholar must be a U.S. citizen or national, or have permanent resident status. Postdoctoral Fellowships are normally made to U.S. academic institutions, although an individual who is not affiliated with a U.S. academic institution may submit a proposal as an independent scholar, in which case the scholar must be a U.S. citizen or national, or have permanent resident status.

Funding Approximately \$6,200,000 will be made available in FY 2015 to support an estimated 40 awards. Estimated program budget and number of awards are subject to the availability of funds. Funding is as follow: Standard research grants and collaborative grants -- total direct costs will rarely exceed \$400,000. (Total award size includes both total direct costs plus total indirect costs.) Proposals

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

requesting larger amounts of support or a longer duration will be considered, if extraordinarily well justified and merited. The duration is typically for two to three years; Scholar awards -- total direct costs will rarely exceed \$180,000. (Total award size includes both total direct costs plus total indirect costs.) The duration is typically for one year; Postdoctoral fellowships -- provide an annual stipend of \$50,000 per year to cover both salary and fringe benefits for a maximum of two years. Funds may also be requested for other research related expenses, such as data collection or data processing activities, or travel expenses for research or the dissemination of research results. Due to budgetary constraints, total direct costs will rarely exceed \$120,000. (Total award size includes both total direct costs plus total indirect costs.) The maximum duration is typically for two years; Support for conferences and workshops -- typically do not exceed \$25,000 in direct costs; and Doctoral Dissertation Research Improvement Grants -- dissertation grants typically do not exceed \$10,000 in direct costs for research in North America and \$12,500 in direct costs for international research, plus applicable indirect costs. 	Deadline Dates (ALL)	01-Nov-2019			
	Synopsis	<p>The National Science Foundation offers Postdoctoral Research Fellowships to provide opportunities for recent doctoral graduates to obtain additional training, to gain research experience under the sponsorship of established scientists, and to broaden their scientific horizons beyond their undergraduate and graduate training. Postdoctoral Fellowships are further designed to assist new scientists to direct their research efforts across traditional disciplinary lines and to avail themselves of unique research resources, sites, and facilities, including at foreign locations. NSF seeks to promote the participation of scientists from all segments of the scientific community, including those from underrepresented groups, in its research programs and activities; the postdoctoral period is considered to be an important level of professional development in attaining this goal. The goal of the SBE Postdoctoral Research Fellowship (SPRF) program is to promote fundamental research in the SBE sciences; enhance the participation of underrepresented groups in science and engineering; provide an opportunity for independence and advanced training under the direction of a sponsor; and encourage doctoral-level scientists (who are not yet in full-time positions) to take advantage of the two-year Fellowship to prepare for scientific careers in academia, industry or private sector, and</p>			

Fellowships/Scholarships | 2019

Applicant Types	government.
Objectives	<p>Track 1: Fundamental Research in the SBE Sciences (SPRF-FR): The SPRF-FR track aims to support research that builds fundamental knowledge of human behavior, interaction, social and economic systems, organizations and institutions. The proposal must primarily fall within the purview of the SBE sciences – this includes programs supported through the Division of Behavioral and Cognitive Sciences (BCS), Division of Social and Economic Sciences (SES), and SBE Office of Multidisciplinary Activities (SMA). Specifically, this includes but is not limited to research to develop and advance scientific knowledge on human behavior, human cognition, language, social and organizational behavior and culture as well as research on the interactions between human societies and the physical environment. Interdisciplinary research with a primary SBE focus is also supported. The proposal must be motivated by a compelling research question (within the fields of social, behavioral and economic sciences). To acquire the requisite skills and competencies, a sponsoring scientist within the designated SBE field must be selected so that the postdoctoral research fellow and his or her sponsor will complement each other's expertise. Proposals in the FR track will be evaluated on three general dimensions: first, the degree to which results would enhance theories and/ or methodological approaches in the SBE sciences; second, the strength of the proposed Fellow-Sponsoring Scientist team and host institution; and third, the promise of the proposed Fellow's investigation of driving research questions and future career development. In addition to the scientific research, all proposals for the SPRF-FR track must include a specific section within the Project Description with the heading "How this fellowship will advance fundamental scientific knowledge in the SBE sciences ".</p> <p>Track 2: Broadening Participation in the SBE Sciences (SPRF-BP) The SPRF-BP track offers Fellowships in an effort to increase the diversity of post-doctoral level researchers who participate in NSF programs in the social, behavioral and economic sciences and thereby increase the participation of scientists from underrepresented groups in selected areas of science in the United States. Data from the National Center for Science and Engineering Statistics have demonstrated that members of certain ethnic/racial groups (i.e., American Indians or Alaska Natives, Blacks or African-Americans, Hispanics, and Native Hawaiians or Pacific Islanders) in addition to individuals with disabilities are underrepresented in the SBE sciences in the U.S. The problem of underrepresentation in the nation's scientific enterprise has been well-documented and reported in the literature. The goal of the SPRF-BP track is to prepare underrepresented SBE scientists and others who share NSF's diversity goals for positions of scientific leadership in academia, industry, and government. The research and training plan in these applications must fall within the purview of the</p>

	<p>SBE sciences (see Section II.1 for details) at NSF, including research on the topic of broadening participation (see SBE's Dear Colleague Letter NSF 17-143 for more details on the science of broadening participation). The SPRF program also welcomes proposals on research to develop and advance scientific knowledge on human behavior, human cognition, language, social and organizational behavior and culture as well as research on the interactions between human societies and the physical environment. Interdisciplinary research with a primary SBE focus is also supported. To acquire the requisite skills and competencies a sponsoring scientist within the designated SBE field must be selected so that the postdoctoral research fellow and his or her sponsor will complement each other's expertise. Proposals in the BP track will be evaluated on three general dimensions: first, the degree to which results would enhance theories and/ or methodological approaches in the SBE sciences; second, the strength of the proposed Fellow-Sponsoring Scientist team and host institution; and third, the promise of the potential Fellow's investigation of driving research questions and future career development.</p> <p>Proposals may only be submitted by the following: NSF SBE Postdoctoral Research Fellowships are awards to individuals; proposals are submitted directly by the Fellowship candidate to NSF. Each Fellowship candidate must identify one sponsoring scientist and host institution (with whom the sponsoring scientist is affiliated) at the time of proposal submission. Fellowship candidates may propose to hold the Fellowship at: Institutions of Higher Education (IHEs) - Two- and four-year IHEs (including community colleges) accredited in, and having a campus located in the US, acting on behalf of their faculty members; and Non-profit, non-academic organizations: Independent museums, observatories, research labs, professional societies and similar organizations in the U.S. associated with educational or research activities. Fellowship candidates must meet all of the following eligibility requirements: -be a U.S. citizen, national, or legally admitted permanent resident alien of the United States as of the application deadline; -obtained a doctoral degree in the SBE sciences within 36 months before the application deadline or will obtain the doctoral degree within 10 months after the application deadline; -not already in a full-time tenure-track faculty position; and -not have submitted the same research to another NSF program. Each candidate may submit only one Fellowship proposal per year.</p> <p>Support may be requested for up to 24 months at a level of \$69,000 per year and may be prorated accordingly. A no-cost extension may be requested to extend the Fellowship award in order to complete the goals of the Fellowship, but no supplemental funds will be provided for this purpose. Within the Fellowship period, up to two months of the Fellowship duration may be used for paid leave, including parental or family leave. The paid leave cannot be used to increase the level of the</p>

	Deadline Dates (ALL)	11-Feb-2019		
	Synopsis	Post-Doctoral Fellowships and Pre-Doctoral Externships are part-time, one- or two-year appointments in which candidates receive in-depth training in rational-emotive and cognitive behavior therapy, serve as therapists in the Institute's clinic, co-lead groups and workshops, receive 3 hours of individual and group supervision a week, and participate in research. Successful completion of all requirements will result in Fellowship or Associate Fellowship status of the Albert Ellis Institute.		
	Applicant Types			
	Objectives	The Fellowship and Externship Programs offer highly diversified training: Clinical experience: Trainees devote 10 hours per week to clinical practice, including co-leading a therapy group with senior staff. Supervision: 3 hours of supervision per week with a licensed Senior Staff Clinical Psychologist. Co-lead workshops in coping with anxiety, anger, procrastination, self-defeating eating, and numerous other topics. Clinical seminars: Mental health and other professionals are brought in to provide a comprehensive training experience.		
	Eligibility	Eligible applicants for fellowships are Postgraduates with a Doctorate in psychology, Master's in Mental Health Counseling, M.S.W., R.N., or M.D. Predoctoral Externs nearing completion of Ph.D. thesis pursue a similar program to Fellows.		
	Funding	Successful completion of all requirements will result in Fellowship or Associate Fellowship status. (rjh)

Applicant Types	epilepsy-relevant theme under the guidance of a mentor with expertise in epilepsy research. The research can encompass basic, translational, or clinical research into the causes, treatment, and consequences of epilepsy and the implementation of epilepsy management.
Objectives	Predoctoral Research Fellowships support predoctoral students pursuing dissertation research with an epilepsy-relevant theme under the guidance of a mentor with expertise in epilepsy research. The research can encompass basic, translational, or clinical research into the causes, treatment, and consequences of epilepsy and the implementation of epilepsy management. Applicants for the postdoctoral fellowship have the option of applying for an additional travel award to attend a high-quality training course or conference to supplement the training received during their award. Priority will be given to opportunities for hands-on training experiences.
Eligibility	Applicants must: be matriculating in a full-time doctoral (Ph.D.) program in a field relevant to epilepsy research; have a defined research plan and access to institutional resources to conduct the proposed project; have a qualified mentor(s) with expertise to supervise and provide guidance on the specific aspects of epilepsy related research targeted in the proposal; and have not previously been awarded an AES or an Epilepsy Foundation Predoctoral Fellowship. In addition, U.S. citizenship is not required; however, all research must be conducted in the U.S. Applications are encouraged from women, members of minority groups, and people with disabilities. A single laboratory can submit only one proposal across all AES early career grant programs.
Funding	The fellowship award offers up to \$30,000 with \$29,000 for stipend and and/or benefits, \$1000 for travel support to the AES annual meeting, as well as one year of complimentary AES membership and registration for the AES annual meeting. The award period is twelve months. No indirect costs are provided. The number of awards granted each year is contingent upon available funds. (msw)

Deadline Dates (ALL)	15-Mar-2019
Synopsis	The Episcopal Church Foundation awards fellowships to individuals pursuing advanced academic studies and special ministries with the aim of educating and equipping future lay and clergy leaders. Applicants to the Fellowship Partners Program must choose to apply to either the academic or ministry track of the ECF Fellowship Partners Program. Awards range up to \$15,000.

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

Applicant Types				
Objectives	<p>Applicants may apply for either an academic or ministry fellowship. Academic Fellows will have an impact on the formation and development of lay and clergy leaders, will address a recognized shortage area in scholarship/teaching, or will address an area where the Episcopal Church needs to develop expertise. Applicants will provide a synopsis of the proposed course of study, express a commitment to forming the next generation of scholars and ministry leaders, demonstrate the need for this particular study, and propose a methodology for sharing the knowledge, experience, or best practices gained in this study. Ministry Track Fellows are engaged in ministries at the community or congregational level that will change individuals, groups or communities in positive ways, impacting their ability to see and use God's gifts, bringing them into a closer relationship with God. Applicants will provide an outline of the proposed ministry, show how this helps to develop leaders in the Episcopal Church, describe how the wider Church will benefit from this ministry, and propose a methodology for sharing the knowledge, experience, or best practices gained in this project. Examples include, but are not limited to, pilot projects in an emerging area. These projects should serve as models that can be used in different settings. Examples include, but are not limited to, pilot projects in an emerging area of congregational development, adaptations of existing programs in new locations, or the development and testing of resources designed for congregational or community use. Please note: while an individual may be associated with a church agency, it is the individual who is recognized as the Fellow.</p>			
Eligibility	<p>Applications from both lay and clergy are welcome. Fellowship applicants on the academic track must be engaged in or embarking on a course of study at the graduate level, except for first professional degrees (e.g. M.Div., J.D., M.D.). Acceptable courses of study include doctoral and masters level programs, as well as clinical study or training at the post-undergraduate level.</p>			
Funding	<p>Typically, ECF has awarded three to four fellowships per year. Awards range up to \$15,000 and Fellows may apply to renew grants for up to three years (renewal grants are capped at \$10,000). (rjh)</p>

Deadline Dates (ALL)	09-Jan-2019
Synopsis	PODS I & II Scholarships, part of the Foundation’s Doctoral Opportunities for Clinicians and Scholars (DOCS) Program, are to fund post-professional doctoral students, who, having completed one full year of coursework, wish to continue their studies or have entered the dissertation phase of their post-professional doctoral program.
Applicant Types	
Objectives	Scholarship categories within the PODS program have been established for the two distinct phases of education and training: PODS I – A 1-year, \$7,500 scholarship to support individuals in the coursework phase of post-professional doctoral studies. PODS II – A 1-year, \$15,000 scholarship to support individuals in the post-candidacy phase of post-professional doctoral studies.
Eligibility	For both PODS I and PODS II -- At the time of application, the applicant must: possess a license to practice physical therapy in the U.S. or in a U.S. jurisdiction, or have met all the requirements for physical therapy licensure in the U.S. or in a U.S. jurisdiction, including having received a passing score on the licensure exam, or possess a physical therapist assistant license in the U.S. or in a U.S. jurisdiction, or have met all the requirements for licensure as a physical therapist assistant in the U.S. or in a U.S. jurisdiction, including having received a passing score on the licensure exam. Be enrolled as a full or part-time student in a regionally, fully accredited post-professional doctoral program whose content has a demonstrated relationship to physical therapy. Students enrolled in transitional Doctor of Physical Therapy (tDPT) programs are not eligible for Foundation scholarship support. Must demonstrate commitment to further the physical therapy profession through research and teaching in the United States and its territories. Be a U.S. citizen or permanent resident. For PODS I: The applicant must have completed the equivalent of two full semesters or three full quarters of post-professional doctoral-level coursework prior to the start of the scholarship year, September 1, for which the proceeds will be used. The applicant will be ineligible for a PODS I scholarship if candidacy status (as defined by his/her institution) is achieved prior to the start of the scholarship year, September 1. An application submitted as a PODS I will NOT, under any circumstances, be reviewed as a PODS II in the event it is determined that the applicant will achieve candidacy status (as defined by her/her institution) prior to the start of the scholarship year, September 1. For PODS II: The applicant must have achieved candidacy status (as defined by his/her institution) prior to the start of

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

	<p>the scholarship year, September 1. An application submitted as a PODS II will NOT, under any circumstances, be reviewed as a PODS I in the event that the SRC determines that the criteria for a PODS II are not met. Confirmation of candidacy status must be confirmed in the online application by the mentor/advisor. If candidacy will be achieved after the due date of the online application and before the start of the scholarship year, September 1, written confirmation from the institution must be provided to the Foundation by August 1. If candidacy is not achieved by the start of the scholarship year, funding for the applicant will be withdrawn.</p> <p>Scholarship categories within the PODS program have been established for the two distinct phases of education and training: PODS I – Up to \$7,500 per year in support of the coursework phase of post-professional doctoral studies prior to candidacy (as defined by the applicant’s institution). PODS II – Up to \$15,000 in support of the post-candidacy phase of post-professional doctoral studies (as defined by the applicant’s institution). Successful PODS I and PODS II candidates may receive up to three PODS I and two PODS II awards totaling \$52,500. A new application is required for each year. (cmb)</p>

Deadline Dates (ALL)	<p>31-Jan-2019</p>
Synopsis	<p>The Foundation for Urban and Regional Studies (FURS) offers studentships within the field of urban and regional studies.</p>
Applicant Types	
Objectives	<p>FURS is concerned to promote urban and regional research, and within this broad field it is particularly keen to encourage an understanding of the interconnection between social, economic and political processes and of the broader causes and effects of these processes. This means for example that research which examines policies critically and focuses on their unintended as well as intended consequences is more likely to be supported than research on managerially defined questions. Conversely research which takes a 'technical' approach to urban and regional questions and does not place them within wider contexts of understanding is unlikely to be given priority. Although these concerns are likely to lead to social scientists such as sociologists, political scientists, geographers, economists and town planners predominating among applicants, others such as</p>

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

Eligibility	lawyers, cultural theorists, anthropologists and historians should not be discouraged from applying. Funding is only offered to those doctoral students who are within the field of urban and regional studies. Only applicants whose nationality falls into the countries listed in Groups B and C of the World Bank classification will be eligible to apply.				
Funding	The one-year studentship for doctoral research is renewable annually for a further one or two years subject to satisfactory progress reports: the value of this studentship is currently worth £12,000 per annum paid in 3 installments. The Trustees have the discretion to increase this in the light of special circumstances or hardship. No additional support can be given towards travel expenses; the studentship can be spent on fees but is not intended to cover the full costs of being a student, and applicants will therefore need to apply for other sources of funding. Deadline Dates (ALL)	11-Jan-2019				
Synopsis	The FNSNA Undergraduate Scholarship Program is comprised of two separate but distinct scholarships: the General Scholarship Program and the Promise of Nursing Program.				
Applicant Types	The General Scholarship Program is open to all currently enrolled nursing students across the country, the General Scholarship Program awards these scholarship funds based on a set of criteria established by the sponsor of the scholarship. These scholarships typically reflect a specific area of specialization within the nursing profession such as oncology, critical care, or emergency nursing or a certain population of the nursing profession that is often under represented. The Promise of Nursing Scholarship Program is aimed at addressing the critical nursing shortage that faces this country.				
Objectives	Eligible applicants are students currently enrollment and matriculated in a state-approved nursing program leading to an associate degree, baccalaureate, diploma, generic pre-licensure doctorate or generic pre-licensure master's degree; or enrolled in an RN to BSN completion, RN to MSN completion, or LPN/LVN to RN program; or pre-nursing students taking courses to prepare for matriculation into a nursing program. Applicants must be attending classes and taking no less than six credits per semester. Applicants must be a U.S. Citizen or Alien with U.S. Permanent Resident Status/Alien Registration Number. Students graduating before December 2019 are ineligible to

Fellowships/Scholarships | 2019  
Sorted by Sponsor Name

Objectives	The purpose of the Interchange Fellowships is to foster British-American relations through the interchange of scholars in horticulture, landscape architecture, and related fields and to promote the exchange of information in the horticultural field.
Eligibility	The RHS Interchange Fellowship is open to a single, unaccompanied American college graduate who has earned a BA or BS degree in horticulture, landscape architecture, or a related degree. Selected finalists are required to attend an interview at their own expense and will be notified of the time and place. The GCA Interchange Fellowship is open to a British university graduate with a degree in horticulture, landscape architecture, botany or environmental studies, or to a British student horticulturist with a recognized horticultural qualification. Only one scholarship, fellowship, or award can be applied for annually.
Funding	The RHS Interchange Fellowship reimburses up to 12,000 GBP for the costs of transportation, housing, food and personal expenses for one American student to spend ten months working and studying at leading horticultural centers or historic and botanic gardens in the UK, gaining valuable exposure to British horticultural techniques and developing contacts with the wealth of experience that the RHS has established with British horticulture. The GCA pays for a round trip ticket to the UK, for the visa applications, and provides additional \$6,000 for personal expenses. The GCA Interchange Fellowship provides up to US 36,500.00 for a British recipient to attend a graduate program in horticulture, landscape architecture, or environmental studies at a US university for one academic year or for a one-year internship at Longwood Gardens in the US. Financial support for the internship is shared among Longwood Gardens, The Garden Club of America, and the Royal Horticultural Society. (cas)

Deadline Dates (ALL)				
Synopsis	The sponsor provides PhD scholarships to highly qualified young scholars.			
Applicant Types				
Objectives	<p>The aim of this scholarship programme is to support highly qualified young scholars. The Foundation will only consider applicants who have proven their exceptional talents by means of their achievements in their studies and the results of their examinations and whose dissertations are expected to be well above the average. The duration and course of the studies, final grade, age and any special qualifications will play a significant role in the selection process. Funds are provided for research and PhD scholarships for German and foreign scholars. Support is primarily provided for the historical humanities, in particular to support research projects in the following fields: Archaeology; Art History; Historical Islamic Studies; History; History of Law; History of Science; and Prehistory and Early History.</p>			
Eligibility	<p>Only applicants who are not older than 28 years at the time of concluding their master studies may be included in the selection process. This age limit shall be extended to take the following situations into account: night school, bringing up children, military or civil service, work experience and other exceptional circumstances. For an application to be considered in the selection process the overall master grade awarded must be at least 1.5 or above in Germany (comparable with grade A in other countries). For candidates with a foreign degree, a special examination for inclusion in the selection process will be performed in the Foundation's office. The final grade achieved in legal exams also will likewise be assessed separately.</p>			
Funding	Scholars may receive: a monthly scholarship sum of 1,400 euros, a childcare allowance, and if required, travel and material expenses. The maximum duration of research is two years. (cmb)

Program URL	<a href="http://www.jeffersonscholars.org/nationalfellowship">http://www.jeffersonscholars.org/nationalfellowship</a>			
Deadline Dates (ALL)	01-Feb-2019			
Synopsis	National Fellowships support outstanding scholars at top institutions across the country who are completing dissertations in American history, politics, public policy and foreign relations.			
Applicant Types				
Objectives	Under the leadership of the Jefferson Scholars Foundation, the National Fellowship Program will: Support one year of dissertation research and writing. Award each Fellow a stipend. Pair each Fellow with a renowned senior scholar in his or her field. These senior scholars will serve as mentors, suggesting relevant literature to frame the Fellows' work, offering critique of the Fellows' writings, and providing general advice on research. Provide Fellows with training in public engagement, from crafting op-eds and posting blogs to expressing their ideas through techniques employed by the digital humanities. Host two annual conferences that frame the year of Fellowship, one in the fall and the second in the spring. Both conferences will be held at the Jefferson Scholars Foundation and will provide an opportunity for Fellows to present their scholarship and receive feedback. All mentors attend the spring conference and comment on the Fellows' work.			
Eligibility	An applicant must be a Ph.D. candidate who is expecting to complete his or her dissertation by the conclusion of the Fellowship year. This is not a post-doctoral fellowship. Non-U.S. citizens are eligible to apply.			
Funding	Up to eight National Fellows will receive: One year of support for dissertation research and writing A stipend of \$25,000. Mentoring from a renowned senior scholar in the field Invitations to two annual conferences, one in the fall and the second in the spring (tld)
